CYPAD MEAL SELECTION
THE FULLY CENTRALISED CASHLESS CATERING SYSTEM
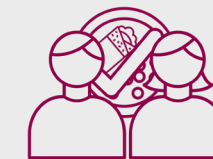

Cypad Meal Selection

Meal Selection gives caterers the ability to remove all cash from the kitchen making them safe, secure and cashless - allowing parents to book and pay for meals in advance, be it a week or term ahead.

Parents have the ability to update Meal Selection with any allergies and special dietary needs. These are managed though centralised menus, increasing safe-guarding.
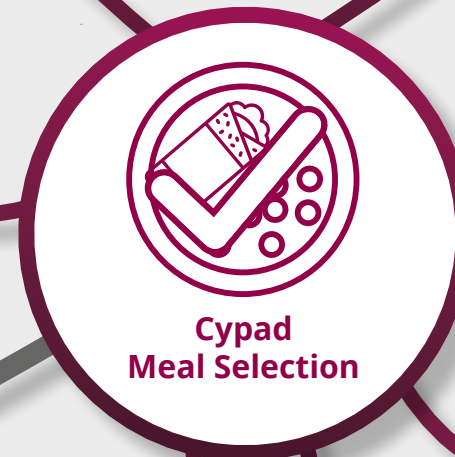

Meal Selection provides caterers the ability to centrally manage all menus across their entire estate, areas, zones and specific sites.

Nutritional Analysis allows caterers to compose recipes based upon nutritional content, and outputs a cost per plate and an average cost spread across a week.
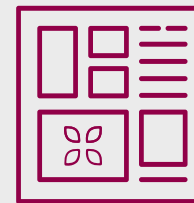

Increased all-round engagement with meals being pre-ordered from home and in-class. Meal Selection links directly with the school's MIS to allow simultaneous attendance write-back.

Fully integrate **Cypad Meal Selection** with Kitchen Manager for the holistic approach to managing your kitchens and the meals they produce.

Meal Selection takes paper out of the whole process of ordering meals. Meal numbers are accessed by the kitchen staff though an online report or the use of our supplied tablet. Saving time, saving money and reducing administration.

Meal Selection is completely configurable and is designed to complement your existing debt policies - with the aim of actively assisting your operation in the management of debt.
